Title: MULTI-MEDIA PROTOCOL FOR SLOT-BASED COMMUNICATION SYSTEMS

## AMENDMENT/REPLY TRANSMITTAL LETTER

RECEIVED

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

FEB & 6 2004

**Technology Center 2600** 

Enclosed is a reply for the above-identified patent application. A Petition for Extension of Time is also enclosed. П Terminal Disclaimer(s) and the ☐ \$55.00 (2814) ☐ \$110.00 (1814) fee per Disclaimer due under 37 C.F.R. § 1.20(d) are also enclosed. Also enclosed is/are Small entity status is hereby claimed. Applicant(s) requests continued examination under 37 C.F.R. § 1.114 and enclose the □ \$385.00 (2801) □ \$770.00 (1801) fee due under 37 C.F.R. § 1.17(e). Applicant(s) requests that any previously unentered after final amendments <u>not</u> be entered. Continued examination is requested based on the enclosed documents identified above. Applicant(s) previously submitted \_\_\_\_ for which continued examination is requested. Applicant(s) requests suspension of action by the Office until at least which does not exceed three months from the filing of this RCE, in accordance with 37 C.F.R. § 1.103(c). The required fee under 37 C.F.R. § 1.17(i) is enclosed. A Request for Entry and Consideration of Submission under 37 C.F.R. § 1.129(a) (1809/2809) is also enclosed.

No additional claim fee is required.

$\Box$ $A$	An additional	claim fee	is required.	and is	calculated as	shown below.

SYSTEMS

**Technology Center 2600** 

Sir:

In response to the Office Action mailed December 3, 2003, reconsideration and allowance of the above-identified patent application are respectfully requested.

Claims 1-28 remain pending.

Initially, Applicant notes with appreciation the indication that claims 22-24 and 27 have been allowed. Applicant also notes with appreciation the indication in paragraph 7 of the Office Action that claims 3-7, 9, 14-18 and 28 are objected to but would be allowable if rewritten in the manner described in that paragraph.

Claims 1, 2, 8, 12, 13, 19, 25 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 5,483,524 to *Masui et al.* ("*Masui*"). This ground of rejection is respectfully traversed.

Masui does not anticipate claim 1 because Masui does not disclose all of the elements of claim 1. For example, Masui does not disclose the step of "communicating a first data packet on a first one of a set of time slots associated with the synchronous communication link from the first communication unit to the second communication unit by including an address associated with the second

communication unit in the first data packet" as recited in claim 1.

Masui discloses a reservation technique for a CDMA mobile communication system. Referring now to figure 2B and column 5, lines 20-25 of Masui, data transfer from a transmitting terminal to a base station requires a reservation packet, while data transfer from the base station to the receiving terminal does not require a reservation packet. The data packet for transmitting information illustrated in figure 5 5C of Masui includes a destination address 34, which can be a link number if a link number if a link has been secured. (Col. 7, lines 56-57). It appears that the destination address is associated with the receiving terminal. (See, for example, col. 5, lines 6-19).

Accordingly, *Masui* discloses that when a packet is transmitted over the reserved communication link between the transmitting terminal and the base station, the destination address is not that of the base station, but that of the receiving terminal. Therefore, *Masui* discloses transmitting a data packet from a first communication unit (i.e., the transmitting terminal) to a second communication unit (i.e., the base station) with an address of a communication unit other than the second communication unit (i.e., the receiving terminal's address). Accordingly, the address in the data packet from the transmitting terminal is not "an address associated with the second communication unit" as recited in claim 1.

The Office Action asserts that traffic channel 9 of *Masui* corresponds to the synchronous communication link recited in Applicant's claim 1. The Office Action also asserts that the transmitting terminal and the receiving terminal of *Masui* respectively correspond to the first and second communication units recited in Applicant's claim 1. *Masui* discloses that traffic channel 9 can be reserved for each data packet separately or can be reserved for a plurality of contiguous or intermittent slots by sending a single reservation packet. (Col. 6, lines 52-57). However, the traffic channel 9 between the transmitting or receiving units and the base station is that a synchronous communication link, nor does it comprise a set of time slots that the synchronous communication link. Additionally, *Masui* does not disclose that the communication link from the transmitting terminal through the base station to the destination terminal is, as asserted by the Office Action, a synchronous communication link.

Because Masui does not disclose a synchronous communication link, Masui

cannot disclose the step of "communicating a first data packet on a first one of a set of time slots associated with the synchronous communication link from the first communication unit to the second communication unit by including an address associated with the second communication unit in the first data packet" as recited in claim 1.

Claims 2, 8 and 25 variously depend from claim 1, and are, therefore, patentably distinguishable over *Masui* for at least those reasons discussed above with regard to claim 1.

Claim 12 recites a communication system with similar elements to those discussed above with regard to claim 1, and hence, claim 12 is not anticipated by *Masui* for similar reasons to those discussed above in connection with claim 1. Claims 13, 19 and 26 variously depend from claim 12, and are, therefore, patentably distinguishable over *Masui* for at least those reasons discussed above with regard to claim 12.

For at least those reasons stated above, it is respectfully requested that the rejection of claims 1, 2, 8, 12, 13, 19, 25 and 26 as allegedly being unpatentable over *Masui* be withdrawn.

Claims 10, 11, 20 and 21 are rejected under 35 U.S.C. §103(a) as being unpatentable over *Masui*. This ground of rejection is respectfully traversed.

Claims 10, 11, 20 and 21 variously depend from claims 1 and 12. As discussed above, *Masui* does not disclose all of the elements of claims 1 and 12. It is respectfully submitted that *Masui* does not suggest all of the elements of claims 1 and 12. Because *Masui* does not disclose or suggest all of the elements of claims 1 and 12, *Masui* cannot render unpatentable claims 10, 11, 20 and 21, which variously depend from claims 1 and 12.

For at least those reasons stated above, it is respectfully requested that the rejection of claims 10, 11, 20 and 21 for obviousness in view of *Masui* be withdrawn.

Attorney's Docket No. <u>040070-438</u> Application No. <u>09/348,495</u> Page 4

All outstanding objections and rejections having been addressed, it is respectfully submitted that the present application is in condition for allowance. Notice to this effect is earnestly solicited. If there are any questions regarding this response or the application in general, the Examiner is encouraged to contact the undersigned at 703-838-6578.
